

Closed Test Guide

Afterschool Geekery Uganda progress tracking app

Thank you for testing the app. You do **not** need to test every feature. Choose the path that matches the time you have.

10 minutes

Quick test

Check installation, mentor login, the main reporting workflow, curriculum, and support.

[Go to 10-minute test](#)

30 minutes

Extended test

Create your own mentor/course data, submit a report and story, then review them as administrator.

[Go to 30-minute test](#)

Closed-test requirement: remain opted into the Google Play test and keep the app installed for at least 14 days.

For everyone

- Use fictional test data only. Do not enter real children's names or personal information.
- Use only non-sensitive images if you upload photographs.
- If something breaks or feels confusing, that is useful test feedback. You do not need to work around it.
- Do not edit or deactivate records created by another tester.

When you finish, use the [feedback section](#) at the end of this guide.

10-minute quick test

This path uses the shared mentor account and existing test data. It is meant to check whether the ordinary mentor experience works and makes sense.

Shared mentor account

Phone	0123456789
PIN	123456

1. Install the app from the Google Play closed-test link and open it.
2. Choose **Mentor** and sign in with the shared account above.
3. Look around the mentor home screen. Open **My profile** and **Manage courses**.
4. Open **Manage students** and view one existing student. Do not edit the student.
5. Open **Log a session**. Choose an available course, use today's date, select the relevant mentor(s), mark attendance, enter a short fictional project/outcome, and submit the log.
6. Open **View session logs**, find the log you just submitted, and check that the information is displayed correctly.
7. Open **Curriculum**, expand one category, and open one chapter. On Android it should load in the app; on the web it should open in a browser tab.
8. Open **Privacy & support** from the top bar and check that the privacy-policy link works.
9. Log out.

If you reach roughly 10 minutes, you can stop. There is no need to explore every menu item.

[Jump to feedback](#)

30-minute extended test

This path tests the main workflow across both roles: administrator setup, mentor reporting, and administrator review.

Ask the coordinator for your tester number, from **01** to **15**. Replace **NN** below with that two-digit number. This keeps your records separate from other testers' records.

Administrator account

Phone	0987654321
Password	Judge123

A. Set up your test data as administrator

1. Choose **Administrator** and sign in with the account above.
2. Open **Manage mentors - Add mentor**. Create:
Test Mentor NN; phone **07000000NN**; Country ID **1**; language English; temporary PIN **123456**; Active on.
3. Open **Manage courses - Add course**. Create **Test Course NN**, Country ID **1**, today's weekday, any convenient starting time, Active on. A short test description is enough.
4. Open the new course, choose **Assign mentors**, assign **Test Mentor NN**, save, then log out.

B. Report activity as your new mentor

1. Choose **Mentor** and sign in with phone **07000000NN** and temporary PIN **123456**. When asked, change it to another six-digit PIN and keep it until testing is finished.
2. Open **Manage courses** and confirm that **Test Course NN** is visible.
3. Open **Manage students - Add student**. Create **Test Student NN** with fictional details, Country ID **1**, and assign the student to **Test Course NN**.
4. Open **Log a session**. Select your course and today's date, select **Test Mentor NN** as teaching mentor, mark the test student present, enter a short fictional project/outcome, and submit.
5. Open **View session logs**, find the new log, and check that it looks correct. Open the student from the log as well.
6. From the log, choose **View or upload photos** and upload exactly three different non-sensitive test images.
7. Open **Stories - Submit story**. Select **Test Course NN**, enter a short fictional success story, add one non-sensitive image, and submit.
8. Open one chapter in **Curriculum**, then log out.

30-minute extended test - continued

C. Review your submissions as administrator

1. Sign in again as **Administrator**.
2. Open **View session logs**, find your new log, and confirm the course, date, mentor, project, attendance, student link, and three photographs.
3. Open **Stories**, find your new story, and confirm that its text and photograph are correct.
4. Log out.

If you still have time

Choose only one or two things that interest you. There is no need to do all of these:

- edit the mentor, course, or student you created;
- try a filter in one of the lists;
- open **Track students** and review your test student;
- open **View photos**;
- submit or review a **Course visit** report;
- close and reopen the app, then check whether everything still behaves normally.

Please do not deactivate or modify another tester's records.

Feedback

A short response is enough. Please send the coordinator:

- your tester number, if you used the 30-minute path, and your phone model;
- whether you did the 10-minute or 30-minute path;
- anything that failed, was unclear, slow, or visually awkward;
- one improvement you would suggest, if anything comes to mind;
- a screenshot if you saw an error.

Example

```
Tester 03, Samsung A14. 30-minute test completed.  
Everything worked except photo upload took a long time. I also found the session-  
log list slightly difficult to scan.
```

Thank you for helping test Afterschool Geekery Uganda's progress tracking app.
